

**SERVICE METAL COMPANY SRL**

To whom it may concern

**SUBJECT: Issuing of positive list from UBA ( Federal German Agency of Environment)  
about materials must be in contact with drinking water.**

Since 1° December 2013 the Positive List, which includes materials in compliance with production of parts aimed to drinking water treatment, will enter into force in Germany.

After two years of transition, it will be an European obligation binding for the exclusive using of materials mentioned in that positive list since 1° December 2015.

Service Metal Company S.r.l, in strict co-operation with Italian and European Foundry Association, still following the development of this specification and it's ready in supplying alloys defined by UBA as below:

- **Alloy for Brass CB752S EN1982**
- **Alloy for Bronze CB499K EN1982 and CC499K EN 1982**
- 

Both of these alloys, have been modified referring the norm EN1982 after tests made on drinking water during last 24 months and they are available in our company.

We can provide the alloys mentioned above in Brass Ingots for production of faucet and industrial taps and in Bronze for Ingots and solid/hollow bars for production of fittings and valves either.

You can find in the attached file an extract of the specification's draft issued by UBA on April 2013 for alloys mentioned above.

If you have some technical or commercial requests, please don't hesitate to contact us through usual direct contacts or through our sales agents.

Best Regards,

*Marco Capoferri  
Sales and Marketing Manager*
